PROFESSIONAL SUMMARY

Data Scientist with 3 years of experience building production-grade LLM, NLP, and machine learning systems across healthcare, edtech, and AI research domains. Expertise in fine-tuning foundation models, developing RAG pipelines, prompt engineering, and evaluation frameworks. Proven track record of taking AI solutions from prototyping to production deployment using Python, SQL, GCP, while collaborating with product, engineering, and business stakeholders to deliver measurable user and business impact.

WORK EXPERIENCE

CVS Health

New York, NY

Data Scientist

Aug 2024 – May 2026

- Architected an end-to-end LLM platform to extract structured clinical insights from unstructured discharge notes across a 1.2M-member population, **reducing clinician review time by 80%** through schema-guided prompting with **Pydantic**, **ClinicalBERT-based hallucination detection**, and continuous performance monitoring to ensure clinical accuracy.
- Built a chronic condition risk model combining **RAG-based fact extraction** with structured LLM prompting over claims and clinical data; the model identified high-risk patient cohorts projected to drive **~\$100M in cost avoidance**.
- Designed and shipped an internal **Streamlit-based platform** for prompt engineering, experiment tracking, and model evaluation, standardizing AI development workflows **across 2 teams** and **reducing manual experimentation effort by 60%**.
- **Eliminated 70% of ad-hoc data requests** by consolidating 20M+ rows across disparate clinical sources (EHR, IMP, claims) into a unified SQL/BigQuery dataset, enabling product and engineering teams to run self-serve analytics independently.
- Led controlled validation experiments comparing LLM outputs against medical directors' reviews across patient subgroups, using precision, recall, and statistical significance testing to assess model performance and reliability.
- Designed **20+ SQL-based engagement metrics** and built **Tableau dashboards** to track user interaction patterns, click behavior, and LLM summary usage, enabling data-driven product decisions and surfacing actionable trends.
- Presented ML insights, experimentation results, and behavioral trends to C-level stakeholders for strategic decision-making.
- **Mentored 3 junior associates** on experiment design, SQL best practices, and production ML workflows.

Mindgrasp

Columbia, MD

Product Data Scientist

Jan 2024 – April 2024

- Designed and launched an AI-powered Math Question Answering feature by integrating **Wolfram Alpha with AWS Lambda** backend services and **React-based user interface**, achieving **38% adoption** among existing users within 2 months of launch.
- Designed and ran **A/B experiments** across onboarding funnels, pricing flows, and user journeys using **Segment and Mixpanel**, identifying behavioral insights that informed product iterations.

Subconscious AI

New York, NY

Machine Learning Engineer

May 2023 – Jan 2024

- Built, trained, and integrated discrete choice causal models to **simulate customer populations as digital twins**, achieving **93% predictive accuracy** against real human behavioural benchmarks validated **across 350+ published studies**, enabling clients across pharma, CPG, and consulting to pressure-test pricing, messaging, and product decisions before market launch.

SKILLS

Languages/Frameworks: Python, SQL, Pandas, NumPy, XGBoost, Matplotlib, Scikit-learn, Keras, ReactJS, HTML/CSS

Machine Learning: LLMs, RAG, Prompt Engineering, NLP, Classification, Regression, Clustering, A/B Testing, Statistical Analysis

Database & Management: Data Warehousing, Data Modelling, PostgreSQL, RDS, BigQuery, Spark, Airflow, Tableau, Jupyter

Cloud & Other Tools: Amazon Web Services, Google Cloud Services, Segment, Mixpanel, Figma, Jira, Confluence, MS Office Suite

PROJECTS

Recommendation System using MovieLens Dataset (SQL, Spark)

- Built a scalable movie recommendation system on the MovieLens 32M dataset using PySpark's ALS algorithm for latent factor modelling, benchmarking against user-based and popularity-based approaches to maximise accuracy.

EDUCATION

New York University, Master of Science in Computer Engineering, May 2023

Guru Gobind Singh Indraprastha University, Bachelor of Technology in Information Technology, Sept 2020

LEADERSHIP & RECOGNITION

- **Speaker**, AICamp'24 NYC, **Data Summit'25** Boston, Selected Speaker at Women Who Code'26
- **Best Medical Hack** at **MHacks 13 hackathon**; developed ReactJS web app to match COVID-19 patients with plasma donors.
