PROFESSIONAL SUMMARY

Full-stack Data Scientist with 4+ years of experience building production Machine Learning and Generative AI/LLM systems, including RAG pipelines, prompt engineering, LLM applications, and evaluation frameworks. Skilled in Python, SQL, Ruby on Rails, PostgreSQL/MySQL, and ReactJS, with a proven ability to take AI products from experimentation to production and partner cross-functionally with stakeholders to translate ambiguous business problems into measurable, production-ready solutions.

WORK EXPERIENCE

CVS Health

New York, NY

Data Scientist

Aug 2024 – May 2026

- Architected and shipped a **production LLM pipeline** that extracts **structured clinical insights** in **JSON format** from unstructured discharge notes for a **1.2M-member** population, reducing clinician review time by **80%** through **schema-guided prompting (Pydantic)**, and a **ClinicalBERT**-based guardrail for hallucination detection to ensure clinical accuracy.
- Evaluated model selection and tradeoffs across GPT-4 and GPT-3.5-turbo, tuning **temperature and prompt strategies** (few-shot examples, schema-constrained prompting) to balance extraction accuracy, latency, and token cost for the clinical LLM pipeline.
- Built a chronic condition **risk-prediction model** combining **RAG-based fact extraction** with **structured LLM prompting** over claims and clinical data to identify high-risk patient cohorts projected to drive **~\$100M in cost avoidance**.
- Led **controlled experimentation** comparing model outputs against medical-director review across patient subgroups, using **significance testing (precision, recall)** and **Bayesian estimation** to quantify reliability and uncertainty before rollout.
- Consolidated **20M+ records** across disparate clinical sources into a unified, well-modeled BigQuery dataset using **complex SQL queries (joins, window functions, CTEs)**, eliminating **70% of ad hoc data requests** from product and engineering teams.
- Partnered with Product, Engineering, and clinical leadership to translate ambiguous business questions into analytical solutions, **standardizing 20+ KPIs in SQL** and **building Tableau dashboards** that informed executive decision-making.
- Mentored **3 junior associates** day-to-day across task planning, code reviews, and feedback to keep delivery on track.

Mindgrasp

Columbia, MD

Product Data Scientist

Jan 2024 – April 2024

- Designed and shipped an AI-powered Math Q&A feature end-to-end by integrating **Wolfram Alpha with an AWS Lambda backend** and **React front end**, achieving **38% adoption** among existing users within 2 months of launch.
- Ran the trial-to-paid conversion workstream, analyzing the signup-to-paid funnel in **Mixpanel** (DAU/MAU, retention, cohort conversion) and A/B testing paywall placement to lift **trial-to-paid conversion 12%**.

Subconscious AI

New York, NY

Machine Learning Engineer

May 2023 – Jan 2024

- Built, trained, and integrated discrete choice causal models to **simulate customer populations as digital twins**, achieving **93% predictive accuracy** against real human behavioral benchmarks validated **across 200+ published studies**, enabling clients across pharma, CPG, and consulting to pressure-test pricing, messaging, and product decisions before market launch.

SKILLS

Languages/Frameworks: Python, SQL, PostgreSQL, PySpark, Pandas, NumPy, XGBoost, Matplotlib, Scikit-learn, Keras, HTML/CSS

Machine Learning & AI: LLMs, RAG, Prompt Engineering, NLP, Classification, Regression, Clustering, Model Evaluation

Statistics & Experimentation: A/B Testing, Hypothesis Testing, Time-Series Analysis, Statistical Significance, Cohort Analysis

Cloud & Other Tools: AWS, GCP, Docker, dbt, Mixpanel, Segment, Tableau, Power BI, Git, Jira, Figma, Confluence

PROJECTS

Content Management System (Ruby on Rails, Postgres, Heroku) ([Github](#))

- Designed and implemented frontend and backend architecture of a Content Management System using Ruby on Rails.
- Created responsive layouts to enhance user experience for content creation, task management, & publishing capabilities.

EDUCATION

New York University, Master of Science in Computer Engineering, May 2023

Guru Gobind Singh Indraprastha University, Bachelor of Technology in Information Technology, Sept 2020

LEADERSHIP & RECOGNITION

- Speaker**, AICamp'24 NYC, Data Summit'25 Boston, Selected Speaker at Women Who Code'26
- Best Medical Hack** at [MHacks 13 hackathon](#); developed ReactJS web app to match COVID-19 patients with plasma donors.
